

### 3 Hollins, Newby & Rimington Bridge (DK walk 3) Approximately 2 1/2 miles

Start the walk at Rimington House 1, which used to be the Black Bull pub. Go towards Gisburn until the stile 2 on the right hand side, opposite The Old Manor House is reached.

#### 1 -Rimington House

#### 2

Go over the stile then straight up the field then to the left to find a stile 3. The far side can be messy in wet conditions. Then go straight on to a pair of V stiles 4. Go through the gap in the hedge to the right of these leaving a pair of holiday cottages to your left.

#### 3

#### 4

Then bear left to a stile **5** in the wire fence behind which is a derelict V stile and a lamp post. Turn right on to the green lane, and follow the green lane round to the right through a gate and then over the stile **6** opposite Hollins Farm.

**5**

**6**

Turn left past the house on the corner and go through the galvanised field gate **7**, then diagonally across the field to a stile **8** in the far fence.

**7**

**8**

Continue in the same direction to a squeeze stile **9** in the facing fence, go through that and a small thicket to come out in Stopper Lane.

**9**

**10**

Immediately opposite go through the small mesh gate **10**.

Go diagonally left across the field to where there are the fallen remains of a stile and gate **11**. IGNORE the stile in the fence to your left and go straight downhill to cross a small stream after which turn left to a gate and stile **12**.

**11**

**12**

Carry on along this track over a small ford **13** and come out over a stile **14** on to the road at Newby.

**13**

**14**

It is then possible to turn left and go back by road to the starting point. However it is more pleasant to turn right and after a short distance turn left at redbrick houses built on the site of Newby Mill **15**. Turn left here up the green lane then left again to find a stile **16** on RHS where the track bends.

**15**

**16**

Walk straight on toward an electricity pole and to a track descending right towards the water treatment works. On the left hand side of the work's fence there is a gate **17**. Go through the gate and ignore the gate **18** immediately ahead and go diagonally across the field to the stile **19** in the corner.

**17**

**18**

Go over the stile and walk with the hedge on the right to the gate and stile **20** on Rimington Lane.

**19**

**20**

A worthwhile diversion here is to turn right and go over the bridge to investigate the site of Rimington Corn Mill **21**, its mill pond and goit (water channel), at the far end of the pond. The walk continues by turning left after stile **20** to where immediately on your left there is stile **22** in the wall

**21**

**22**

From this stile go slightly to the right up a slight slope over stile **23** (with building blocks) to kissing gate **24** nearly in the corner of the field. Go through this to Stoops Lane.

**23**

**24**

Turn left here and after a few metres there is a gate **25** on the right, before Stoops Farm. Go through this gate and before you there is a stile **26** to go over before entering a field with large trees and a good example of an old hedge and ditch boundary on your right.

**25**

**26**

Continue to the far end of this field where there is a gap **27** where the stile used to be. Go through this gap turn to the left and after a few metres there is another stile **28**.

**27**

**28**

Go over this stile and then diagonally to stile **29** opposite The Old Manor House. Go over this stile to drop down into Rimington Lane and Rimington House is just a very short walk to the left. The final picture shows the Black Bull **30** as it was just before its conversion to apartments.
